Notes to Editors:

Ironveld (IRON.LN) is the owner of a High Purity Iron, Vanadium and Titanium project located on the Northern Limb of the Bushveld Complex in Limpopo Province South Africa. Ironveld expects to mine its own VTM ore as feedstock for a 15MW DC smelter which will produce speciality iron products including high purity iron powder as well as vanadium and titanium slag products.

The Definitive Feasibility Study published in April 2014 confirms the project's viability to deliver an exceptionally high grade iron product (99.5% Fe) called High Purity Iron which commands a premium in the market place. High Purity Iron Powder is widely used in powder metallurgy, in magnetic materials and in manufacturing of welding rods. Vanadium and Titanium slag containing commercial grades of vanadium and titanium will also be produced and sold. Vanadium has historically been used as ferrovanadium or as a steel additive adding a considerable increase of strength to steel. However it is the development of vanadium redox flow battery systems for grid energy storage applications that has the most potential to have a significant impact on future vanadium demand. Titanium Slag is an upgraded white pigment that is used in the manufacture of paint, paper and plastics.

Ironveld's Board includes; Giles Clarke as Chairman, Peter Cox as CEO, Vred von Ketelhodt as CFO, Nick Harrison and Rupert Fraser as a Non-Executive Directors.

Ironveld is an AIM traded company. For further information on Ironveld please refer to www.ironveld.com.
